

TONE AND STYLE

Understand how the tone and style of your prompts influence the AI's responses.

ASSUMING A ROLE

Leverage ChatGPT's ability to take on various roles for enhanced interaction.

TYPES OF RESPONSES

Familiarize yourself with the different response formats that ChatGPT can generate.

LIMITATIONS OF CHATGPT

Be conscious of the limitations when engaging with ChatGPT for realistic expectations and effective interactions.

CHATGPT PROMPTS

SPECIFY THE DESIRED RESPONSE FORMAT

The initial prompt sets the tone for the AI's response. To guide the AI accurately, specify the desired format (e.g., "Write a poem about...", "Explain the concept of...").

PROVIDE CONTEXT

Giving detailed context in the prompt can help the AI generate more relevant responses. For instance, when inquiring about a historical topic, specifying the time period or region can be beneficial.

USE A CLEAR AND DIRECT TONE

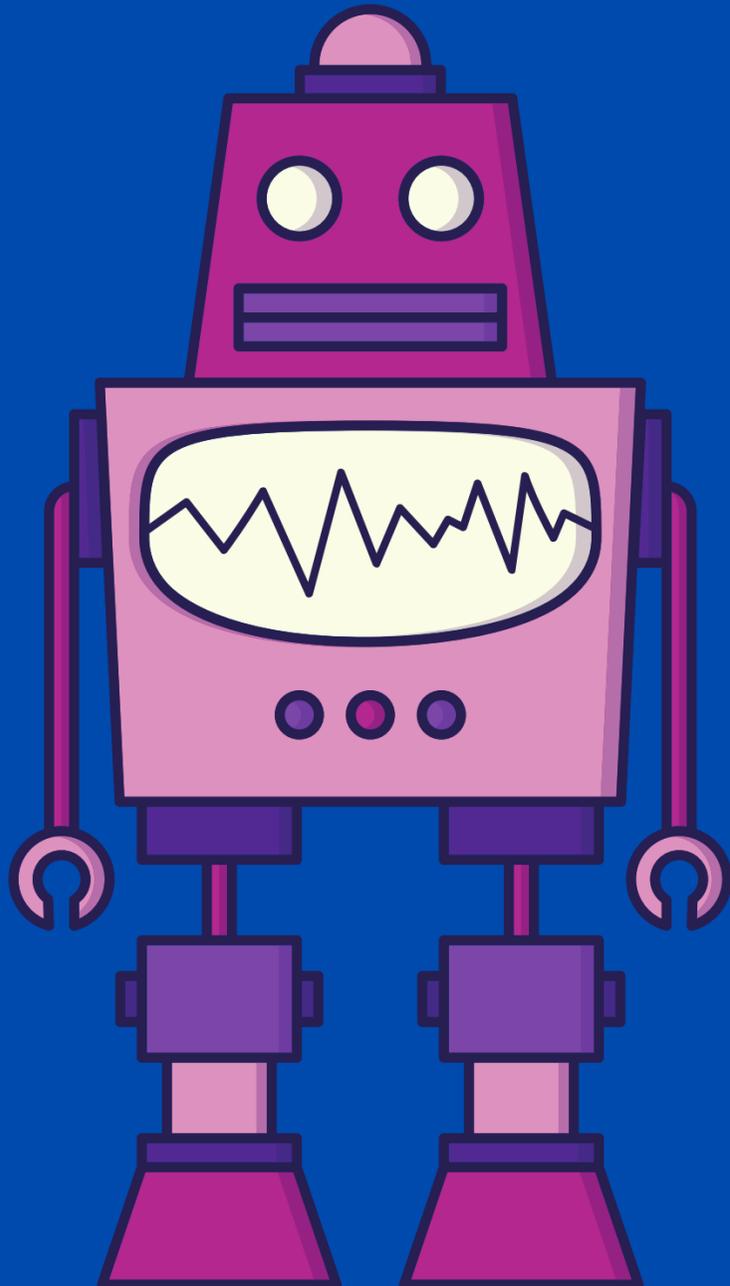

ChatGPT works best with direct and clear prompts. The more specific and unambiguous you are, the better the response you'll receive.

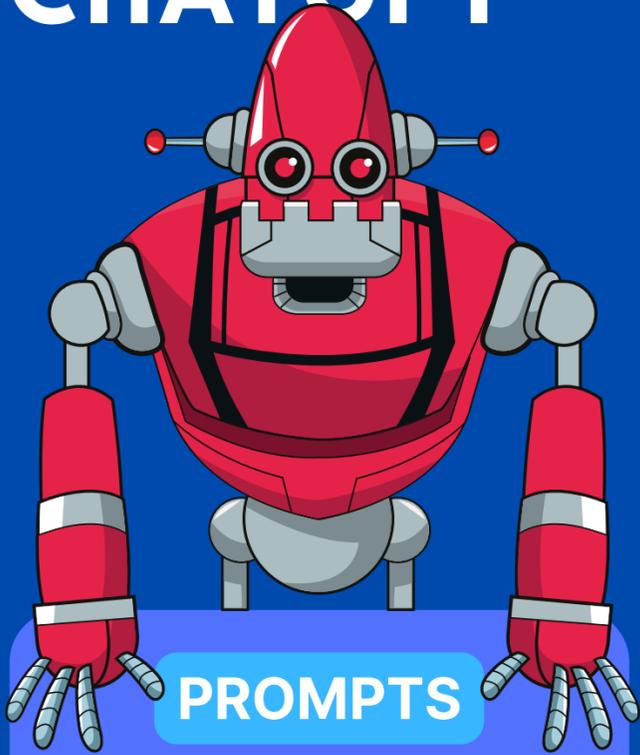

TAILOR YOUR PROMPT

Depending on the objective, the structure of the initial prompt can change. Direct questions are ideal for informative responses, while open statements work well for creative responses.

REFINE YOUR PROMPTS

If the initial response doesn't meet your expectations, don't hesitate to adjust your prompt. Adding details, modifying the wording, or specifying the format can guide the AI towards a more suitable response.

TONE AND STYLE

FORMAL VS INFORMAL

Decide whether to adopt a formal tone (akin to an academic report) or an informal tone (reminiscent of a casual conversation among friends).

OBJECTIVE VS SUBJECTIVE

Choose if the response should be factual and impartial (objective), or if it can incorporate personal opinions and emotions (subjective).

SERIOUS VS HUMOROUS

Opt for a serious, direct tone, or infuse your interactions with humor and light-heartedness.

SIMPLE VS COMPLEX

Reflect on the complexity of the language required. Simple language is easily comprehensible, while complex language may involve technical terms or advanced vocabulary.

DIRECT VS INDIRECT

Determine whether the response should be straightforward and concise (direct), or more nuanced, possibly implying more than what is directly stated (indirect).

NEUTRAL VS EMOTIONAL

Decide if the response should be expressed in a neutral, dispassionate manner, or if it should convey feelings and emotions.

LITERAL VS FIGURATIVE

Choose between a direct, literal response or consider the inclusion of metaphors, symbolism, and other forms of figurative language.

POSITIVE VS NEGATIVE

This refers to the overall sentiment of the content - whether it should be optimistic and uplifting, or more pessimistic and critical.

RESERVED VS EXPRESSIVE

Decide whether the language used should be restrained and subtle or more vibrant and emotionally expressive.

FACTUAL VS IMAGINATIVE

Choose if the content should be strictly based on facts and concrete realities, or if it can be more creative and imaginative.

CONCISE VS DETAILED

Consider whether the response should be brief and to-the-point, or lengthy and detail-oriented.

STRUCTURED VS FLUID

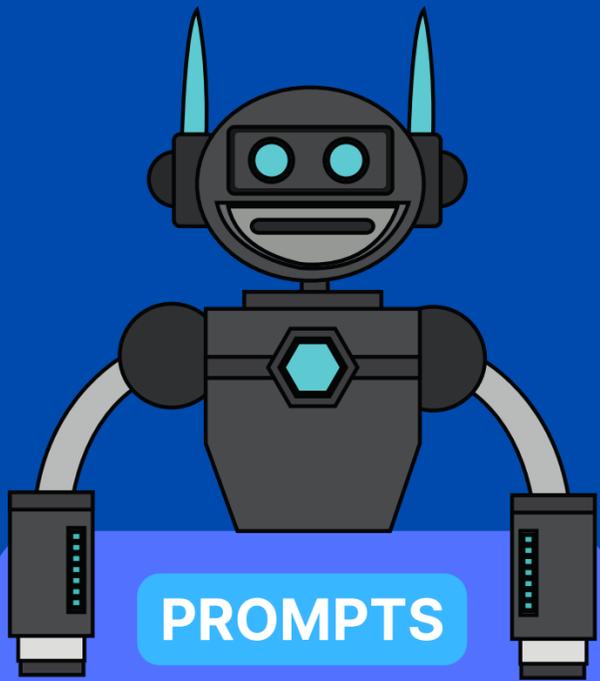

Decide between content that adheres to a strict structure and format, or content that is more free-flowing and spontaneous.

ACADEMIC VS COLLOQUIAL

Understand the difference between an academic tone, which might include jargon and formal sentence structure, and a colloquial tone, which is conversational and may include slang and idiomatic expressions.

IMPERSONAL VS PERSONAL

Determine whether the response should be written from a neutral, impersonal standpoint, or if it can include personal perspectives and emotions.

ASSUMING A ROLE

NARRATOR

To narrate a story or describe a scene or event.

BUSINESS CONSULTANT

To provide advice and guidance on business matters such as marketing, sales, or management.

CODE WRITER

To generate code examples for specific programming problems or answer programming-related questions.

TUTOR OR TEACHER

To explain complex concepts in a simple and easy-to-understand manner.

FICTION WRITER

To create stories, character dialogues, and fictional scenarios.

TECHNICAL WRITER

To write technical manuals, FAQs, or documentation.

MEDICAL OR HEALTH CONSULTANT

To provide general information on health and well-being (but remember, it is not a substitute for professional medical advice).

JOURNALIST

To write informative articles or analyze specific events.

LIFE COACH

To provide guidance and advice on personal issues or life challenges.

TRANSLATOR

To translate text between different languages.

POET

To write poetry or verses.

VIRTUAL ASSISTANT

To answer general questions, schedule appointments, set reminders, and help organize your life.

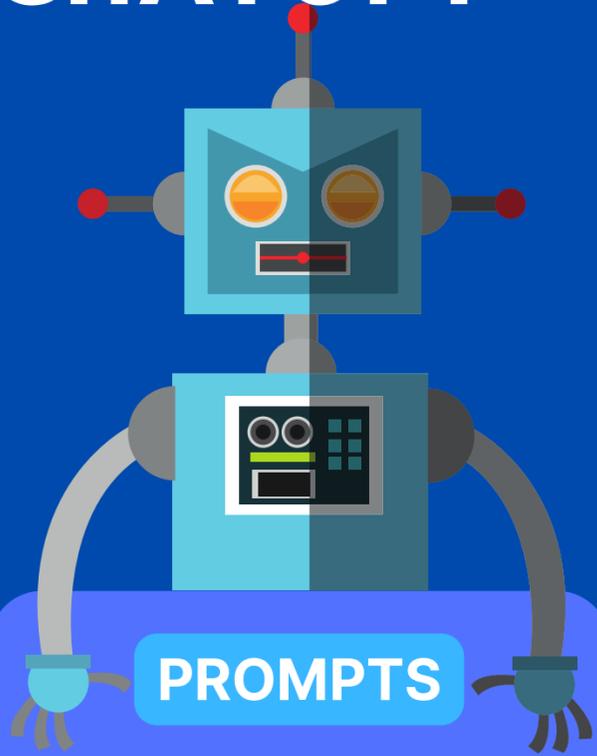

GAME EXPERT

To provide tips and strategies for games or even act as a character in a role-playing game.

HISTORIAN

To provide analysis and summaries of historical events, as well as discuss the implications and contexts of such events.

TYPES OF RESPONSE

HISTORY

If you want the model to create a narrative. You can further specify, such as "science fiction story," "fairy tale," etc.

DIALOGUE

If you want the model to produce a conversation between characters or individuals.

CODE

For situations where you want the model to generate programming code.

FACTS

If you are using the model to obtain factual or explanatory information, such as "the life cycle of a butterfly" or "how photosynthesis works."

SUMMARY

If you want the model to summarize a long text.

TRANSLATION

If you want the model to translate text from/to a specific language.

QUESTIONS AND ANSWERS

If you are using the model to respond to specific questions.

CREATIVE WRITING

If you are looking for poetry, monologues, or other forms of creative writing.

ADVICE

If you are seeking suggestions or advice, such as "tips for better sleep" or "ways to improve writing."

IDEAS

If you want the model to generate ideas, such as "ideas for a fantasy novel" or "ideas for a science project."

TEXT REVISION

If you want the model to improve or review a text.

PLANNING

If you are using the model to assist in planning, such as "steps to organize an event."

LANGUAGE LEARNING

If you are using the model to learn or practice a new language.

BRAINSTORMING

If you want the model to help generate a variety of ideas on a topic.

SCIENTIFIC EXPLANATIONS

If you want the model to explain complex scientific concepts in simpler terms.

BOOK/FILM RECOMMENDATIONS

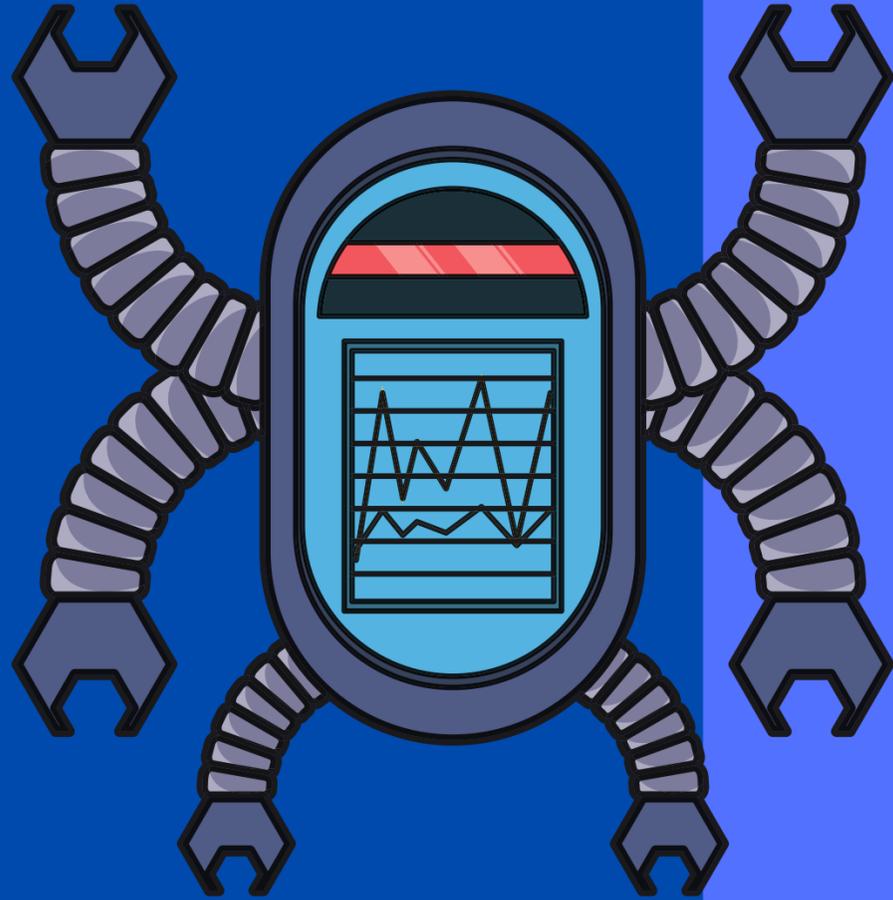

If you are looking for reading or movie suggestions.

INTERVIEW PREPARATION

If you want the model to provide common interview questions and answers.

MATH EXPLANATION

If you are using the model to solve math problems or provide explanations for math problems.

LIMITATIONS

LIMITED CONTEXTUAL UNDERSTANDING

May not fully comprehend the context, tone, or intent of a question.

RISK OF INCORRECT INFORMATION

Might generate information that is factually incorrect or misleading.

LACK OF REAL-WORLD AWARENESS

Doesn't have knowledge about events that have occurred after its last training date.

RISK OF OFFENSIVE OR HARMFUL CONTENT

In some cases, may produce content that is offensive, harmful, or inappropriate.

EXCESSIVE GENERALIZATION

May generate responses that are vague, generic, or unhelpful, especially when producing creative ideas.

ABSENCE OF PERSISTENT MEMORY

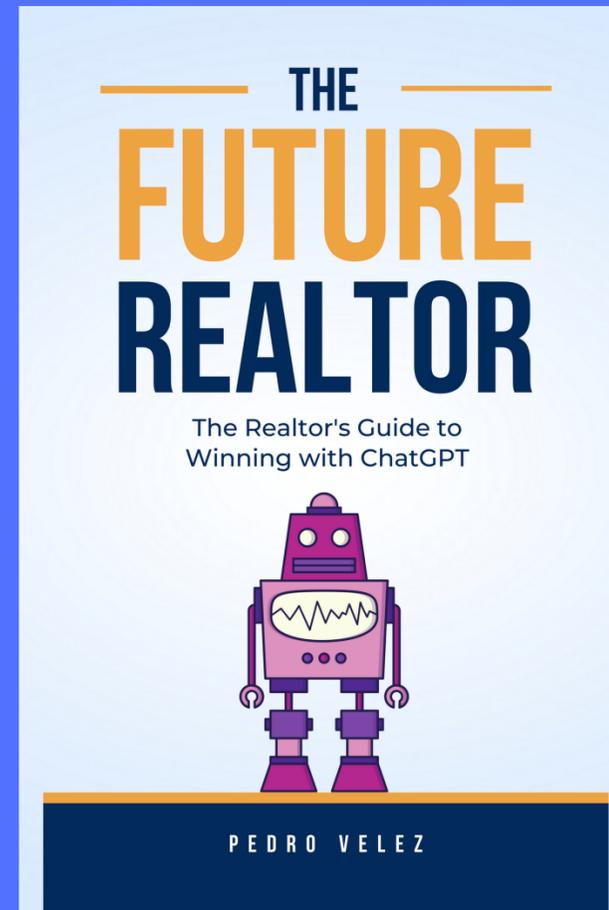

Lacks knowledge of previous responses or conversations, affecting consistency in a long conversation.
